Ismail Rakip Karas, 2001

You can download the program (Converter.exe), a sample data file (ilan.txt) and an empty database file (gebze1.mdb) using following link. So you can evaluate the program and see the results.

After browsing and selecting the data file (ilan.txt), when the "Ok" button is clicked, thousands of datum will be converted and transferred to database (gebze1.mdb) using user-friendly interface of the software. (I recommend to backup the empty database first, because you will probably need it to re-operation. And to see content of ilan.txt, please open with WordPad.)

Download "Converter" and Sample Files
